NOTES

Available accessories, dimensions and orientation: please refer to page 24 *SA IL: Accessories Dimensions*.
Input shaft versions:

- Vers. 1: cylindrical input shaft (standard); special executions in different dimensions, with or without key, available on request
- Vers. 5: interface for coupling to fit motors / servomotors supplied by customer (on request).

3.3 Performances

3.3.1 SA 0

Following diagrams show, for each actuator size, the relation between:

- Linear speed v [mm/s] depending on actuator input speed n [rpm]
- Actuator force F [N] depending on input torque T [Nm]

Different values not included in the diagrams can be calculated by linear interpolation.
